

# How To Format Sandisk Extreme Portable

## SSD For Mac

In this article, you will learn how to format sandisk extreme ssd for mac. SanDisk's Extreme Portable SSD works with a USB 3.1 (Gen 2) interface. It is a great backup device for travelers and photographers. You can store and access huge amounts of digital content.

## Sandisk Extreme Portable SSD For Mac.

Connecting The Power Cable With Sandisk Extreme Portable SSD:

- Turn on your Mac computer.
- Start plugging in your SanDisk SSD to your Mac computer.
- Open Disk Utility.

To access Disk Utility on Mac OS, follow these steps:

### **Accessing Disk Utility From Spotlight:**

- Click on the Spotlight icon and then type in disk utility.
- Select the Disk Utility option from the available lists.
- Or else, try to access Disk Utility from Applications.
- On your dock, click Finder.
- In the left pane of the Finder window, search for Applications.
- Select Applications. The Application window opens now.
- Scroll down to locate and open Utilities.
- Click on the Utilities folder and then select Disk Utility.

Let us now initialize and format the SanDisk SSD for Mac.
